

## Getting in the light

When I was a little girl my mom told me a story about electricity, when she was about my age. She told me that it took twice the work then to do jobs. She told me that it took a lot of sweat and hardwork. My mom would help with washing clothes and drying clothes, she would also help with other jobs in the village with other jobs. But when electricity came it was so much easier. It was faster to do every thing. My mom's dad was a person who worked for the ESB. He made lots of money and enjoyed doing it, it was his life. He did it for many years but then he had to retire. He didn't know what to do with his life. I was told that he did lots of different things to pass time for a few years but then it came to a time where he gave up and didn't know what to do with his life. My mom told me who is my granny tried

to help my granddad and my mom tried help him too when it came to the time were it destooded my granddad he was depressed all the time. He was not happy at all, His wife my granmy tried to cheer him up but it didnt work. A month ~~latr~~ later my mums dad got a phone call from the ESB. ~~The~~ The ESB said that they wanted my granddad to become an advisor for the ESB, when he ~~hang~~ hung up the phone he was so thrilled and shouted through the house. The granddad felt very important and it changed his ~~life~~ life forever, He told his whole family the great news and they were so happy for him. They hadnt seen him this happy in forever, it was a ~~big~~ thrill for every one, but just changing a small thing can make a big difference for every one!
