

# ART TUTORIALS

BY LILY AND CAOLIFHIONN

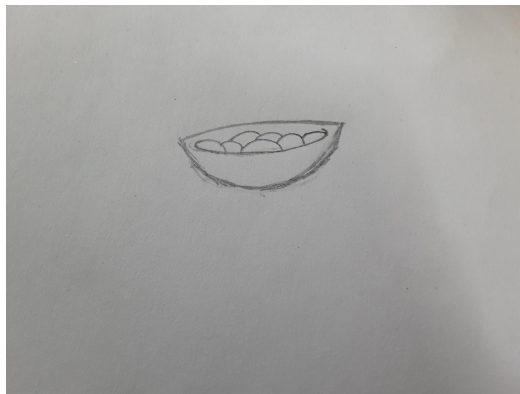

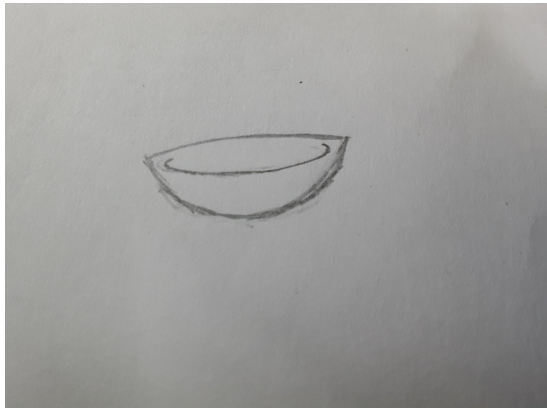

Hello! Welcome to our art tutorials! If you're ever stuck on how or what to draw, then you've come to the right place! We have a few art tutorials for you, including: ramen noodles, and paper planes!

Let's start off with the ramen noodles!

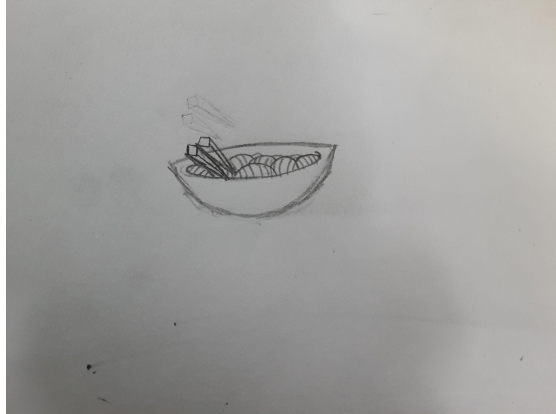

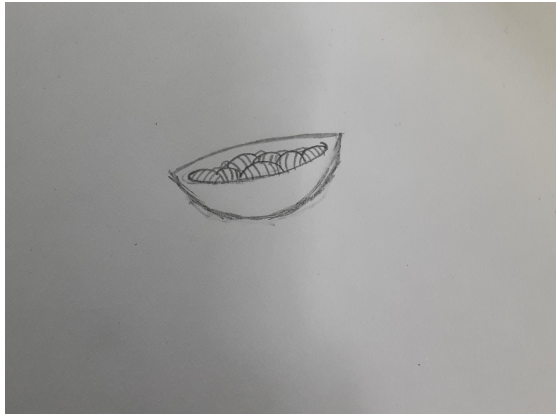

So

first, start off with a curved line Then add another curved line beneath it

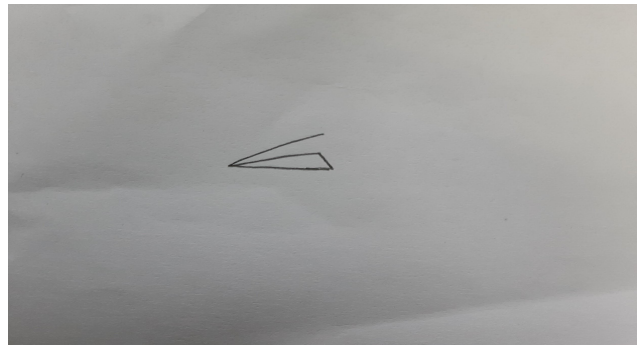

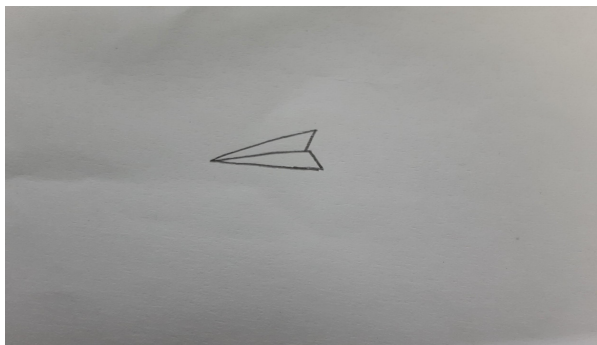

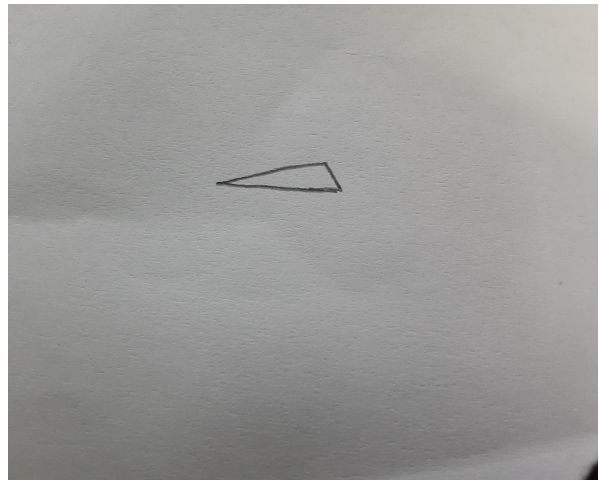

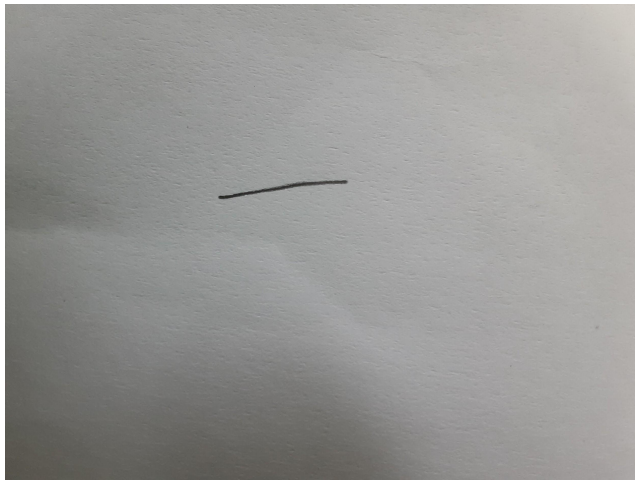

Next, add

a line like this to add some depth to the bowl. And then draw a few lumps (these will be the ramen)

Next, add lines going different directions inside each of the lumps (these are the noodles) and draw some chopsticks to eat them! Now you have some noodles 🍜

Next, paper planes! First you draw a line, and turn it into a triangle! Then, repeat that but on top of the other one. Now, you're done! If you want you can add a likkle trail behind

## TIPS!

Here's a tip that works for most drawings!

If you're ever stuck on how to draw a body doing a certain pose, use circles!

example: (I highlighted them in red so you can see)
