

Kealan

Nancy Maria Donaldson Johnson

Nancy was born in 1794,
New York.

She invented the ice-cream maker
to save energy.

Nancy was a teacher and had
a husband who was a scientist.
She also had 2 children.

Nancy wanted to be a
scientist but they wouldn't let
her, so she made the ice-cream
maker.

Nancy
inspired me
because with
hard work
and believing
in yourself
you can
achieve your
goal!
